Advanced Dental Implant Studies 2017

“If you have taken a MaxiCourse, are placing implants in your practice, and are ready to take it to the next level, this is a must!”
-Cheryl Pearson, DMD
AAID Southern District President, Accredited Member the Aacd, Honored Fellow of the AAID, and Diplomate of the ABOI

Includes Registration to the 2017 Summit on Advanced Dental Implant Studies

Sponsored by:
The Atlanta Institute for Advanced Education
The Difference

• We are not trying to learn the State of the Art; We strive to improve the State of the Art in Restorative and Regenerative Dentistry.

• We are not a study club or another Advanced CE Program. We are an exceptional team coached by the world’s elite clinicians, committed to each other’s personal and professional growth.

• We do not learn by memorizing clinical data, we grow by solving relevant clinical problems.

• We strive to separate ourselves from mediocrity in search of excellence.

• We feel no entitlement in membership, but rather elect to earn the respect of those we respect by our ethics and clinical results.

• We will lead by example and grow by sharing our knowledge and resources.

• We will continue to evaluate ourselves to constantly improve.

After being involved with dental implant education for 37 years, I have decided to make my most significant contribution by coaching and inspiring the distinguished clinicians associated with the Advanced Dental Implant Studies.

Edward J. Mills
Honored Fellow and Past President of the AAID
Diplomat of the ABOI
Co-Director of Dental XP Externship Program
“My relationship with Dr. Edward Mills and the Advanced Dental Implant Studies program has dramatically altered my clinical awareness and competence in such a way that was beyond my wildest dreams. In 4 short years I have been exposed to the world’s top clinicians which has become an invaluable resource.”

Shivam Patel, DDS
Associate Fellow of the AAID

“The Advanced Dental Implant Studies educational process assures that a clinician becomes a critical thinker. You will become confident in handling a wide range of clinical situations. The ADIS will help you accomplish your clinical and professional goals.”

Nelson Daly, DDS
President of the Louisiana Dental Association, Fellow of the AGD, Associate Fellow of the AAID

“One of the best things I have done in my dental career has been my implant training with Dr. Mills. The clinical and academic information I learned was invaluable during that year, but perhaps the most valuable thing was the relationships I formed with Dr. Mills and other top clinicians in the Advanced Dental Implant Studies program. Since that time, I have placed hundreds of implants along side Dr. Mills. His mentorship and the support of my fellow colleagues have given me the hands on skills I've needed to succeed.”

Joey M. Pitts, DMD
Associate Fellow of the AAID

“Dr. Ed Mills does oral rehab and dentist rehab - his coaching and teaching completely changed my dental practice infusing purpose and excitement, not to mention deep detail in clinical information. And now he’s started on the next generation - my son! Both of us are members of the Advanced Dental Implant Studies.”

Joey deGraffenried, DDS
Associate Fellow of the AAID, Fellow of the Academy of General Dentistry

“Through my educational experience with Dr. Mills and my association with the Advanced Dental Implant Studies program, I have been able to raise the bar taking my dental practice to the next level. The podium lectures, clinical coaching and hands on experiences have allowed me to return to my office on Monday morning and take my treatment planning, clinical procedural skills, staff management, patient education and practice marketing to new heights.”

Robert Pauley, Jr., DMD
Corporate Consultant for Carestream, Associate Fellow of the AAID, Fellow of the ICOI

“I have been associated with Dr. Ed Mills and the Advanced Dental Implant Studies forum since 2009. The case based study approach has vastly improved my knowledge of implantology. The success of my practice as well as my confidence in handling complex implant cases, I attribute to Dr. Mills, the ADIS faculty and the educational process that is unique to this program.”

Russell P. Fitton III, DDS
Associate Fellow of the AAID, Restorative Practices in Honolulu and Chicago

“When Dr. Mills created the Advanced Dental Implant Studies program, he surrounded himself with high-level thinkers who encourage each other to raise the bar in both implant dentistry as well as in their personal lives. Their focus seems to be in helping others to achieve what is possible. Dr. Mills has unsurpassed skill and knowledge. After knowing him for 38 years, I promise he will not allow you to rest in mediocrity.”

Gary Michels DDS
Associate Fellow of the AAID, Adjunct Professor at the ECU School of Dental Medicine, Author of “Unusual Success in Dentistry”

“The evidenced based learning that Dr. Mills provides in the Advanced Dental Implant Studies program is an incredible experience. The course curriculum will prepare you to go back to your office and provide patients with new and needed services. Dr. Mills, his faculty, and staff are willing and able to teach and help in any way possible. I am now a member of his ADIS group and it challenges me everyday to strive to learn and expand. The total experience has raised the bar in my practice as well as in myself personally.”

Neil Torgerson, DMD
ADA Council on Annual Sessions, Former General Chairman of Florida National Dental Convention
Program Description:

The Advanced Dental Implant Studies Program is an intense one year commitment in which participants are coached on advanced clinical concepts, which are incorporated in their private practices. The group meets with Dr. Edward Mills in Atlanta for three day sessions four times per year, during which time participants focus on advanced diagnosis, treatment planning, surgical techniques and restoration of complex implant supported prosthetics. The class roster will be made up of approximately 78 clinicians, with approximately half of the group having previously spent 1 to 8 years in Advanced Dental Implant Studies beyond a Comprehensive Implant Training Program. The program has evolved into an intellectual and clinical think tank, which stimulates and inspires a high level of clinical competence. The program will prepare participants for the AAID Associate Fellow and Fellow Exams, the ICOI Diplomat Oral Interview and Written Exam, as well as the ABOI Diplomat Exam.

Individual clinicians will hone their diagnostic, surgical, and prosthetic skills utilizing a case-based learning methodology. The director of the program, Dr. Edward Mills, functions as an instructor and a facilitator for the group, as well as a mentor and coach for each participant. Each participant is expected to complete clinical cases, as well as specific research objectives between each session.

This program is an exceptional opportunity for the serious clinician to continue to develop while enhancing his patient care, as well as the prosperity of his practice.

Course Objectives:

- Develop a working knowledge of surgical and prosthetic procedures required in full mouth dental implant reconstruction
- Enhance diagnostic and treatment planning skills utilizing state-of-the-art technology
- Prepare participants to successfully complete the requirements for the American Academy of Implant Dentistry’s (AAID) Associate Fellow and Fellow credentials, the American Board of Oral Implantology (ABOI) Diplomate credential, as well as the International Congress of Oral Implantologists’ (ICOI) Fellowship and Diplomate credentials

Benefits of the Program:

- Enhance diagnostic, surgical, and prosthetic skills through case-based learning methodology
- Interact and network with premier clinicians so as to learn from each other’s clinical experiences
- Intellectual and clinical growth inspired by a mentor relationship with nationally recognized clinicians and teachers
I want to invite you to be a part of The 2017 Advanced Dental Implant Studies Program. As you are aware you will become part of a unique and elite intellectual development program, that is unlike any other program in the world. The program had its birth 8 years ago when a group of Comprehensive Implant Training Program graduates asked a critical question, “How do we enhance our clinical skills and continue our professional and personal growth beyond this point?” The program has evolved into an intellectual think tank with multilevel coaching of each of the participants.

Our goal this year is to enhance the value of the program, stimulate the growth of individual members, and increase the reputation and authoritative position of the program. The educational methodology involves advanced problem based learning, clinical focus conferences providing insights on specific challenges or techniques, strategic planning followed by matrix based action plans, strategic alliance building resulting in synergistic advantages, and ongoing coaching with timely feedback on clinical and management results.

We will continue to develop and enhance thought processes as well as individual performance by utilizing group dynamics. Individual support groups will be developed, made up of clinicians with a range of experience in ADIS. The groups will enhance communication, provide support, and create a structural network for Problem Based Learning. Individual groups as well as individual members will address the complete group as part of the educational experience. The following educational model is what distinguishes the ADIS program from any other Educational Dental Program that I am aware of. Let us raise the bar in the quality of our presentations.

**Advanced Problem Based Learning:**

Problem-based learning (PBL) is an exciting alternative to traditional classroom learning. Harvard’s Business School's case based education model was the original inspiration for the ADIS educational process. The educational methodology utilized by ADIS has evolved so as to take advantage of not only face to face time, but also the internet, allowing for sharing of specific clinical challenges on a timely basis. Individual members post clinical problems and coaching insights utilizing e-mail blast or shared Dropbox information, allowing the whole group to learn and contribute to the solution. We will enhance our internet presence such that we will have a library of focus conferences, clinical presentations, videos, and problem/solution Chat room.

With PBL, you will be presented with a problem, not lectures or assignments or exercises. Since you are not handed “content” your learning becomes active in the sense that you discover and work with content that you determine to be necessary to solve the problem.

In PBL, I will act as facilitator, coach and mentor, rather than a source of “solutions.”
Program Director

Dr. Mills is the past President of the American Academy of Implant Dentistry. He was the co-director of the Medical College of Georgia’s Comprehensive Dental Implant Program in Implant Dentistry for 27 years and is the director of the Maximus Implant Program. He was the past director of Emory Adventist Hospital’s 3 year residency program in Dental Implantology. He is an honored fellow of the American Academy of Implant Dentistry, a Fellow and Diplomate of the International Congress of Oral Implantologists, and a Diplomate of the American Board of Oral Implantology. Dr. Mills has a private practice focused on restorative dentistry in Atlanta, Georgia.

Minimum Requirements:

• Completion of Comprehensive Implant Training Program
• Passing the AAID Associate Fellow written exam
• Active malpractice insurance

Focus Conferences

• During each session, evidence based literature along with participant’s clinical experiences will be discussed so as to develop additional insight on the most relative and potentially controversial topics challenging the restorative dentist.

Topics Addressed Include:

☑ Occlusion
☑ Complications
☑ Implants on Adolescents
☑ Adjunctive Orthodontic Treatment
☑ Implant Site Development
☑ Enhancing the Aesthetic Zone
☑ Full Mouth Reconstruction
☑ Maxillary and Mandibular Hybrid Prosthesis
☑ Advanced Bone Grafting

Credit:

The Atlanta Institute for Advanced Education is an ADA CERP Recognized Provider. Participants will, therefore, receive continuing education recognition and AGD credit applications for sessions attended. Participants will receive 8 credit hours per day.

Session Dates:

• February 16-18, 2017
• May 11-13, 2017
• August 3-5, 2017
• December 7-9, 2017

Lodging/Location:

The Advanced Dental Implant Studies Program will be held at the Atlanta Institute for Advanced Education located in Atlanta, Georgia. Sessions will begin at 8 a.m. The last day of each session will generally end around 5 p.m. Lodging information will be sent upon receipt of your registration.

Corporate Sponsorship

Course Sessions may have corporate exhibitors which are paying fees to supplement course expenses. Notification of the exhibitors as well as potential conflict of interest disclosures will be provided to participants before each session.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.
** Please detach and send in the following form. For personal attention, please contact Lesley Estes at (404) 252-2125 or email at lesleyacfrd5685@gmail.com.

Registration:

- Class size will be limited to 78 participants
- Course fee includes, beverages, lunches, comprehensive course CD.
- Course Fees:
  - Four Sessions: $15,000
  - Non-Refundable Deposit: $5,000

*Fee Balance is refundable if notice of cancellation is received prior to January 20th, 2017
  - $5,000 due January 1, 2017
  - $5,000 due March 1, 2017

- Early Registration (Paid in Full)
  by December 31, 2016 - $11,500
